There are many reasons why a cookie could not be set correctly. Below are the most common reasons:

- You have cookies disabled in your browser. You need to reset your browser to accept cookies or to ask you if you want to accept cookies.
- Your browser asks you whether you want to accept cookies and you declined. To accept cookies from this site, use the Back button and accept the cookie.
- Your browser does not support cookies. Try a different browser if you suspect this.
- The date on your computer is in the past. If your computer's clock shows a date before 1 Jan 1970, the browser will automatically forget the cookie. To fix this, set the correct time and date on your computer.
- You have installed an application that monitors or blocks cookies from being set. You must disable the application while logging in or check with your system administrator.

**Why Does this Site Require Cookies?**

This site uses cookies to improve performance by remembering that you are logged in when you go from page to page. To provide access without cookies would require the site to create a new session for every page you visit, which slows the system down to an unacceptable level.

**What Gets Stored in a Cookie?**

This site stores nothing other than an automatically generated session ID in the cookie; no other information is captured.

In general, only the information that you provide, or the choices you make while visiting a web site, can be stored in a cookie. For example, the site cannot determine your email name unless you choose to type it. Allowing a website to create a cookie does not give that or any other site access to the rest of your computer, and only the site that created the cookie can read it.

The most recent volume, now over 15 years old and entitled "Coccidiosis in man and domestic animals", is a further reflection of Peter's commitment and ability to work with others to effectively deliver knowledge of the avian coccidia into the public domain. Within the UK Peter helped to establish the forum that is now known as the European Coccidiosis Discussion Group and he was one of the founding members of what was to become the British Society for Parasitology, which later made him an honorary member. Peter Long is a giant in the history of coccidiosis research. Coccidia and coccidiosis in the domestic fowl. Adv Parasitol 6, 313-25. IXth International Coccidiosis Conference • 23. Origins of Coccidiosis Research in the Fowl—The First Fifty Years. Avian Diseases, Vol. 47, Issue. 1, p. 1. CrossRef. Google Scholar. Gerriets, Edzard 1961. The Prophylactic Action of Vitamin a in Caecal Coccidiosis by Protection of the Epithelium. British Veterinary Journal, Vol. 117, Issue. 11, p. 507. in the presence of roughage or protein. Attention is drawn to the occurrence of postcoccidial abscesses which may occur after apparent successful treatment with Sulphamezathine for the cure of coccidiosis.
