Manual de interpretare a habitatelor Natura 2000 din România [Romanian Manual for Interpretation of EU Habitats]

Full text not available from this repository.

Abstract/Summary

The book is an attempt to select and interpret European habitats present in Romania, focusing on biodiversity conservation, environmental protection and legislation. Manualul este fructul unui proiect PHARE privind implementarea retelei Natura 2000 in Romania si se doreste a fi un ghid pentru identificarea acestor habitate. Manual is the fruit of a PHARE project on the implementation of the Natura 2000 network in Romania and is intended as a guide for identifying these habitats. Lucrarea se adreseaza celor care vor contribui la implementarea retelei Natura 2000, personalului agentiilor de mediu si tuturor celor interesati. The book is addressed to those who will contribute to the implementation of Natura 2000 environmental agency staff and all those interested.

Item Type: Publication - Book
Programmes: CEH Programmes pre-2009 publications > Biodiversity > BD01 Conservation and Restoration of Biodiversity
